## WINDLOW WILSONS

### FOUNDATION

Nowhere we publish the names of the Crittenden County Committee to receive and remit the people's free will offerings in testimony of their regard for this remarkable man. The National Committee has listed \$300 as the quota for this county. It is not in the plan to make a "drive" or solicit it in any way. The donations must be voluntary and if those who believe in his policies will hand in the nearest Committeeman from 10c to \$5.00 according to ability, our quota will be quickly reached. In this way a national memorial will be created for a purpose worthy of the man we seek to honor.

### SOLICITS FUNDS

The Crittenden County Committee to solicit funds for the Windlow Wilson Foundation to be created by public subscription in recognition of the national and international services of Woodrow Wilson, twice President of the United States, who furthered the cause of human freedom and was instrumental in pointing out effective methods for the co-operation of the liberal forces of mankind throughout the world.

The Award of Awards from the income of the foundation will be made from time to time by a nationally constituted committee to the individual or group that has rendered with in a specified period meritorious service to democracy, public welfare, liberal thought or peace through justice. Every admirer of Woodrow Wilson is invited to contribute something no matter how slight as his testimonial. Make your donation to nearest committee man named below:

### OUR NEW OFFICERS

E. Jeffrey Travis was sworn in and took charge the first of the month as County Judge. He served as County School Superintendent for several years and as County Road Engineer for some time. He was elected County Judge without opposition. Mr. Travis is a vigorous young man and has had wide experience in the affairs of the county. The people are expecting an efficient administration of the county's affairs and the Press predicts the people will not be disappointed.

Edward D. Stone was sworn in and took charge as County Attorney the first of the month and had his first trial on the third of this month. He was educated in the schools of this county and graduated at Cumberland University in the Law school. He once represented this and Livingston county in the Kentucky legislature. He was elected to the office without opposition. He is a young man of good morals and the people are expecting him to look well after the interests committed to him.

Mr. Jas. T. Wright was elected Sheriff of the County and took over the office on last Monday. He appointed Stevens Joe Hunter Travis and John T. Dickens as his deputies.

Mr. James H. Sullenger was elected Circuit Clerk without opposition and took over the office Monday.

Mr. L. E. Guess succeeds himself as County Clerk and was elected with out opposition. Mr. Guess has served as County Clerk for several years and is a most efficient and painstaking officer.

John C. Speer took possession of the jail and began operation on the first of the year.

### GOOD ROADS

Elsewhere you will see a personal letter by Mr. A. Nissen the official organizer of the Peace Highway that is to be built from Quebec, Canada to Mexico City. It will connect with the Ohio River Highway at Louisville and traverse it to Paducah.

This is to be the greatest of all American Highways and it will come through here on Main Street. Mr. Nissen is organizing the states thru which it will traverse.

When completed, no doubt there will be a constant stream of tourists going over this road at all seasons. This will mean much to this city.

The above man learned while in the road meeting in Owensboro that there were only two counties between Louisville and Paducah thru which the River Road is to run that no action had been taken for the construction of this road. These two counties are Hopkins and Crittenden. No one was able to tell why no action had been taken in these counties.

A resolution was passed in this meeting insisting on immediate action to let contracts and begin construction at an early date. This will be a section, seems destined to become the greatest highway in the world. It is resolved, that we pledge our hearty co-operation with the highway department of the state of Kentucky in the matter of crystallizing sentiment in favor of legislation which will hasten the early construction of this important highway and whereas,

Whereas there has been enacted federal legislation which will encourage the construction of trunk line highways of interstate importance, and Whereas, the International Peace Highway being promoted from Quebec to Mexico City of which the Louisville-Paducah Highway will be a section, seems destined to become the greatest highway in the world. We resolve, that we pledge our hearty co-operation with the highway department of the state of Kentucky in the matter of crystallizing sentiment in favor of legislation which will hasten the early construction of this important highway and whereas,

That work will begin soon in this county. I see that the Government has appropriated funds for roads and over one million dollars of this amount is given to Kentucky.

The right of way has been secured from the Union county line to Lexington thru each farm that this road passes except one. No doubt these will be taken up in due time and the right of way be secured thru the entire county.

### PRESLEY FORD

On the 29th of December Mr. Presley Ford passed over the great divide. He was in his 87th year and died at the country home of W. H. Coe. Mr. Ford was a splendid citizen, industrious and charitable. He lost his sight some time ago.

The funeral services were held in the Cumberland Presbyterian church at Grayne, conducted by Revs. W. T. Oakley and G. P. Dillon, after which the remains were brought here to beautiful Maple View Cemetery for interment.

Rev. W. H. Yates left last Friday for Columbus, Ohio to assist in a meeting.

### EDITORIAL

All together, lets go and make Marion and Crittenden County the Brightest spot in the State of Kentucky. Men of Marion what do you say? Are you willing to do your bit? If you are many of the dreams you have dreamed will come true. "Better times are made by work, Not by wishing." A better town and county is made by co-operation, not by boggling.

Can I help? You certainly can. Let us all be "boosters" and not any of us "roosters" (on the job) What can we do? Why lots of things if we will "get together." In union there is strength and possibility. Here is where you live, here's where you mak eyour money, here is where you should spend it. Here is where you lay the foundation for the education of your children. Why not make Marion and Crittenden county the one spot where childhood will not only want to stay, but will want to come back to when grown into manhood and womanhood. What can we do? Well one of the things help the ladies to build a Play Ground for the children. Have a three day County Fair, one day for the farmers, one day for the schools of the county and town, one day for the merchants of the county and town. Build a Community House where both old and young can find rest and recreation. What do you say? Are you willing to donate your "mighth"?

"United We Stand."

### Synopsis of Owensboro Meeting, of Louisville-Paducah Highway Association, December 22

The foregoing were present at the conference in the afternoon during which time the by-laws were considered and adopted, also the resolution.

About fifty were present at the Lanes Club luncheon at which time the project was introduced.

The resolutions which were adopted at the afternoon meeting were as follows:

"Whereas there has been enacted federal legislation which will encourage the construction of trunk line highways of interstate importance, and Whereas, the International Peace Highway from Louisville to Paducah will be included in the system of roads in Kentucky which will be especially favored by reason of the federal road legislation which has recently been enacted. It is further resolved that we pledge our best endeavors to keep the present roadbed in as good a condition as possible pending construction and to provide suitable de-

tours."

In addition to this resolution a special resolution was adopted expressing appreciation to the original for Crittenden County, Marion, Ky.

### FISHERMEN TO USE PLANES

The use of airplanes to locate the herring shoals, which is under consideration by the Scottish trawler owners, is becoming something of a necessity, according to the Manchester Guardian. In peacetime the herring could be relied upon to follow the same course year after year, trawling from breeding ground to breeding ground in regular routes, each species keeping to its own track. Scotland was there any deviation. Some of these shoals would be three miles wide and several miles in length. Since the war, however, there has been an increasing tendency to leave the old haunts for a period. The herring disappear from the regular track and are lost for weeks. That was the case last year, and again in the early part of the present season. Meanwhile the drifters were searching for the shoals, getting very bare catches and losing money as a consequence. An airplane could cover the sea more rapidly than any trawler, could more readily distinguish the presence of the fish and, by announcing the location to the fishing fleet, could save weeks of fruitless effort.

Unionism is absolutely right in what it proposes to do about Vice Chancellor Buchanan's injunction prohibiting peaceful picketing, says the Brooklyn Eagle. The case is to be carried to the State Court of Appeals of New Jersey, and if necessary, from that commonwealth to Washington. In other words, opposition to the injunction is to be characterized by "due procedure" instead of taking the form of street-corner declamations, which eventuate in nothing worth achieving. Of still greater moment, however, is the cause of organized labor is the effort making to prevent it from seeking recruits in the mining regions of West Virginia, for, should it culminate successfully, the precedent thus established will furnish a base of operation for all who want an open shop. It is this case, which is not part of the whole, but upon which all is staked, that is of absorbing interest to all concerned, friend and foe alike, the question as to the right to picket being merely incidental to it.

### GOOD CHANCE FOR ALL

The young man who says he has no chance willfully ignores the fact that no "golden age" of the past, in any land, ever presented such golden opportunity as America offers him today, says the Philadelphia Ledger. If there is "no chance" for those who come on the stage to play their part in the drama of life today, what chance is there for those who are born a thousand years from today? Many, many centuries ago, Solomon, in a fit of blues, said there was nothing new under the sun. But so much has happened since Solomon that it sometimes seems as if hardly anything happened before Solomon. The best thing about America is not a mountain or a river, a magnificent city, or a renowned castle, a noble building or even a great man; the best thing is the chance it offers to each on a level with all to make his way to the front and to win a success of the right sort. One who is aware of America and the privilege of an American becomes very weary of the talk of pessimists who rail at fate because their lot has been cast in with the manifest destiny of this glorious land of ours. If they would but look abroad, and if they could but realize how others yearn for the blessed boon they scorn! To strike roots and to people heading low under the yoke of the burden of life from day to day it is inconceivable that an American should be blind to the blessing of his heritage.

In Switzerland they are learning to treat men out of work as if they were suffering from a disease, says the Argus. It is found that a man out of work is likely to get the habit. When a man begins to dodge and avoid employment or shirk his normal tasks he is infected with the germ of sloth. He has an ailment or disease that threatens to become chronic. So the authorities step in, much as a doctor would. They diagnose the case, study the symptoms, and endeavor to place the man in some employment where his vocation can be of service to himself and his fellows. The germ of laziness is stunned with an ax and the patient is given a treatment in industry and thrift. A paternal government is not to be highly commended, but a country which could provide that all citizens should work—and at tasks to which they were best fitted—would never have to worry much about its future. Why not vaccinate against idleness?

To some of our people the statistics of American illiteracy are a little embarrassing. It seems that we are the only one among the great nations in which there is a high degree of illiteracy. One man out of every twenty in the vast army we raised to make the world safe for democracy—or democracy safe for the world—could neither read nor write, whereas there was only one illiterate in every 2000 of the German army, says the Indianapolis Star. Statistics as gathered, manipulated, and doctored in some quarters are far from being accurate or dependable. It has been demonstrated, time and again, that there are occasions when figures are made to lie. Before accepting the "one-out-of-twenty" classification it may not come amiss to confess having some inkling of Missouri incredulity.

There is something about the climate of America that produces beauty—beauty that surpasses all known elsewhere in the world. Our women, almost one and all, are wonderful. In some of our industrial centers the evolution of beauty is well seen. People who come over to this country as peasants, traveling in the steerage, themselves not much to look at, have left us heritages in fortune sons and daughters who stand as the highest type of American manhood and womanhood. The peak of perfection seems to be reached in the third generation born in this country, no matter what the race. It is at this stage that the American beauty blooms.

It is said that the degree of doctor of medicine has been conferred upon General Ludendorff by a German university, "because he saved so many lives during the war." The Pittsburgh Christian Advocate remarks somewhat caustically that the Nobel peace prize has not yet been offered to him.

The American Bar Association would institute requirements of two years college work and three years in a recognized law school as essential to admission to the bar. This might not be so bad, provided that 36 months of the 30 in law school were concentrated upon ethics.

Good Plan Is to Allow Three Pounds of Material to Every 100 Pounds of Live Weight.

A rule for feeding silage to the dairy cows is: Feed three pounds of silage for every 100 pounds of live weight. A cow weighing 1,000 pounds should receive about 30 pounds. A cow which weighs over 1,000 pounds should receive about 45 pounds of silage per day. Silage is usually fed twice a day, in the morning and evening after milking.

## DAIRY POINTS

### SUNFLOWER IS MADE USEFUL

Experiments Not Sufficiently Developed to Reach Definite Conclusion in Northwest.

(Prepared by the United States Department of Agriculture)

Sunflowers are likely to become good for silage material for farmers on irrigated land in the Northwest, according to reports received by the United States Department of Agriculture from Montana. The Mammoth Hoosier is in much favor although experiments have been tried with some of the smaller varieties. The sunflowers were drilled in rows 20 inches apart and irrigated. They were put in about the middle of May, but from their frost-resistant qualities it is believed they could be put in at the same time as grain is sown. About 15 pounds of seed were used to the acre on irrigated land but it was stated that if sunflow-

Gathering Sunflowers for Silage.

ers are to be raised under dry land conditions the seed should be put in rows 30 to 36 inches apart.

On the project under observation it was intended to let the sunflowers get fairly well matured, about the same as corn, before putting them in the silo but as a storm broke them down it was necessary to put them in the silo earlier. The yield was from 30 to 40 tons per acre. Cows fed on sunflower silage kept up the usual flow of milk as well as those which were fed on the grain silage. Some of the big Holstein cows ate as much as 40 pounds per day. No unfavorable results could be noticed in the flavor of the milk. While this experiment has not gone far enough to reach definite conclusions, it indicates that sunflowers may be considered a good crop for silage in some localities.

### FIGURE OUT DAIRY RATIONS

Farmers Given Better Understanding of Value and Cost of Various Feeds Available.

A series of 26 dairy feeding schools were conducted during the spring months in the New Hampshire counties by county agents, working cooperatively with the United States Department of Agriculture and the State Agricultural college. Seven more are planned. In carrying out these schools lecturing and forms, talk have been practically eliminated and the dairy men are seated at tables where they figure out for themselves the composition of various rations and compute costs. Much enthusiasm has been aroused.

That the results are worth while is indicated by the statement of a Black earth farmer who reported a saving of \$1 a day, while another who attended the school at Warner wrote the county agent that he is now saving \$30 a month as a result of feeding a ration that he figured out there. The discussion provoked by the farmers figuring these rations gives a better understanding of the value and cost of the various feeds available than any amount of lecturing could possibly accomplish.

### WHITE SCOURS CAUSES LOSS

Disease Contracted by Way of Nose or Mouth Soon After Birth—Tablets Worth Trying.

Many calves die of white scours or pneumonia, which is a deadly germ disease born in the calf and contracted by way of the nose or mouth soon after birth. Medicinal treatment usually fails, but triple sulpho-carbolite tablets are well worth trying under direction of a qualified veterinarian. He should also inoculate each new born calf with polioenteric serum and cholera serum. Give three doses spaced a few hours apart. Provide a new clean pen for new born calves. At birth saturate the stump of the nose of each calf with tincture of iodine and then apply powdered starch. Repeat the treatment daily until the nose is entirely healed. Also cleanse the nose with a saturated solution of borax acid before the calf is allowed to suck for the first time and daily for ten days if it continues to nurse.

## Illinois Central System Ready for the Tasks of 1922

The beginning of a new year is a time when we pause to review what has inspired in the year just ended, seeking to gain from our reflection something which will be of value in deciding our future course.

The eventful year through which we have just passed has been particularly marked by restrictive economic demands upon the railroads. We entered the year full of hope that the business depression which had set in would soon spend its force and that business would again go along normally, but the hope failed to materialize. As a result of the falling off in business, the railroads as a whole during the first nine months of the year earned a net return equivalent to approximately 2.9 per cent upon their valuation—a return barely sufficient to pay interest on outstanding bonds, with no allowance for compensation to the owners. The improvement in net earnings during the latter part of the year has been slow, and in many instances it has been brought about only at the sacrifice of badly-needed maintenance expenditures. A demand for reduced railway rates, in the face of the failure of the railroads, as a whole, to earn a net return sufficient to their needs, also was restrictive in the uncertainty it created.

In spite of these influences, however, the railroads have given adequate service at all times. We should not be discouraged by the present situation, unfavorable as some of its aspects may be.

We should like to give you in this review a statement of how the Illinois Central System has accounted for itself during 1921, but at this time we have complete information covering only the ten months to November 1.

During the first ten months of the year, the Illinois Central System performed a freight service equivalent to carrying 10,286,296,822 tons of freight one mile, as compared with 13,200,197,416 net ton miles in the first ten months of 1920. During the first ten months of 1921 we performed a passenger service equivalent to carrying 642,365,624 passengers one mile as compared with 859,526,161 passenger miles in the first ten months of 1920. This decrease in business is reflected in the gross earnings. For the first ten months of 1921 we had a gross income of \$135,926,186, which was \$6,615,974 less than the gross income of the corresponding period of 1920.

Through drastic reductions in our expenditures, we ended the first ten months of 1921 with a net income of \$7,772,154. Approximately \$3,275,000 was required to pay dividends on stock for the ten month's period, leaving a balance of \$4,396,551 for improvements in our properties. However, during the ten months of this year covered in this report we spent a total of \$16,284,809 for new equipment, over and above amounts spent in the repair and maintenance of equipment and a total of \$6,614,782 for permanent improvements to roadway, over and above expenditures for maintenance. This total new investment of \$22,899,591 exceeded the amount we had left over after paying expenses and a return on investment by \$21,601,047, which had to be borrowed.

We entered the year with 57,081 employees, but the drastic reductions in force made necessary by the great decline in business cut the number to 48,649 in February. Since that time there has been a steady gain in the number of employees. When it became known that a reduced scale of wages would become effective July 1 through the ruling of the Railroad Labor Board, we immediately laid plans for large increases in our forces, with the result that by October we had a total of 60,088 employees in all departments.

In spite of the depression, the Illinois Central has made a creditable showing. One reason for this has been that our employees have striven at all times to perform their service to the public in that efficient and courteous manner which marks our organization. To them belongs much of the credit for what we have accomplished.

We take the position that we are but the trustees of a great investment which has been made in this agency of transportation and that we are responsible to the public for our stewardship. We call the public's attention to the events of the year, and give our pledge that we shall strive to our utmost to make of 1922 a year of still greater successes. To that end we seek your confidence and good will.

Constructive criticism and suggestions are invited.

President, Illinois Central System.

**NO MAN** has ever retired on the money he spent! Like the power of Niagara upon the turbine wheel, is the effect of accumulated dollars in the commercial circle. The great river gathers its strength gradually—and so may you. But there must be a beginning, however small. One hundred pennies are enough to open a savings account, and every dollar you leave will earn four per-cent.

#### SOME REASONS WHY WE NEED A TEACHERS' COLLEGE IN WESTERN KENTUCKY

1. We have no college for our teachers in Western Kentucky.

2. Our teachers must come from Western Kentucky.

3. Most of our students are beyond a 75 mile radius of any teacher's college.

4. Over 240 State Normal graduates are now teaching in High School in Western Kentucky.

5. Our own teachers in the High schools will connect and make interest better in the grades.

6. It will improve the teachers of all our schools.

7. It will bring together better educated students in Western Kentucky.

8. The quality of our athletics will be improved.

9. 1071 students of Kentucky were in Universities of our state last year.

10. Few of these students will come back home.

11. 300 students graduated in Kentucky last year and now only 50 of them are teaching.

12. A teachers college in Western Kentucky will induce more students to go on in school.

13. 50 Vocational teachers were placed in one high school last year, 10 of them were imported.

14. \$20,000 was turned back last year because we had no teachers to fill the Smith-Hughes places.

15. 200 teachers could be placed in High School Vocational Agriculture if we only had them.

These points are not placed here as propaganda but are used to bring before our home people the situation as it is. This Teachers' College can be added to our State Normal school with little extra cost to our state.

If we want our boys and girls to be taught by home grown teachers we must line up behind this movement.

#### VISITS IN MARION

Mrs. I. L. Wheeler who is in her 90th year spent the holidays with her son, B. F. Wheeler, of this city. In spite of her age, Mrs. Wheeler is still quite active and in good health. She is the mother of ten children, eight daughters and two sons. Three of the girls have been teachers in the county.

Her daughter, Miss Fannie, who lives with her mother, visited here with her.

COUNTY ATTORNEY EDWARD D. STONE

#### OBITUARY

Alice Belle Wheeler was born September 21, 1869 and died November 28, 1921 in Walker's Hospital, Evansville, Indiana. She was married to J. A. Wheeler November 14, 1892. She professed faith in Christ when just a girl, joined the church at Piney Creek. She leaves to mourn her loss a husband, one son, Ray; two brothers, Charley and Ray Williamson; three sisters, Mrs. Fannie Bainbridge, Mrs. Ida McGee, Mrs. Fannie Nunn. She was a devoted wife, a loving mother, a good neighbor, a friend to all, to know her was to love her.

The last thing she said in this world was, "I am going home and I want to go." She was 82 years and three days old. Everything that a faithful husband and a loving son and kind friends could do was done. Money and time was not considered, they would have kept her if they could. The funeral was conducted by Rev. J. L. Robertson.
